Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1-15. (Canceled).

- (Currently Amended) A method for applying electrolyte in the manufacture of a 16. battery, comprising applying the electrolyte to a surface in a battery container, the electrolyte being in the form of a spray formed by a vibratory nebulizer, wherein the surface is defined by a separator or a cathode.
- (Previously Presented) The method of claim 16 wherein an average droplet size 17. of the spray is about 5 micron to about 30 micron.
- (Original) The method of claim 17 wherein the spray velocity is about 3 to about 18. 5 inch/sec.
 - (Currently Amended) The method of claim 16 comprising 19. providing a separator, and applying the electrolyte to wherein the surface is defined by the separator.
 - 20. (Cancelled)
- (Currently Amended) The method of claim 20 16 comprising 21. applying the electrolyte such that substantial pooling of the electrolyte in the bottom of the ean container is avoided.

22-50. (Canceled)

51. (Previously Presented) The method of claim 16 wherein the spray has an average drop size of about 1 micron to about 75 microns.

- 52. (Previously Presented) The method of claim 16 wherein the spray has a velocity of about 10 inch/sec or less.
- 53. (Previously Presented) The method of claim 16 further comprising applying a film-forming material with the electrolyte.
- 54. (Previously Presented) The method of claim 53 wherein the film-forming material comprises polyvinyl alcohol.
- 55. (Previously Presented) The method of claim 53 wherein the film-forming material and the electrolyte are applied sequentially.
- 56. (Previously Presented) The method of claim 53 wherein the film-forming material and the electrolyte are applied simultaneously.
- 57. (Currently Amended) The method of claim 16 further comprising providing a eathode, and applying the electrolyte to wherein the surface is defined by the cathode.
 - 58. (Cancelled).
- 59. (Currently Amended) The method of claim 16, wherein the electrolyte is applied to a surface defining an elongated cavity in [[a]] the container.

60. (Previously Presented) The method of claim 59, wherein the surface is cylindrical.

- 61. (Previously Presented) The method of claim 59, wherein the surface is non-cylindrical.
- 62. (Previously Presented) The method of claim 59, wherein the surface comprises an undulating lobe.
- 63. (Currently Amended) The method of claim 16, comprising moving an end of a the vibratory nebulizer along a length of a battery container.
- 64. (Previously Presented) The method of claim 16, wherein applying the electrolyte comprises rotating the container of the battery.
- 65. (New) The method of claim 19, wherein the separator includes a cellulose material.
